1. Provide a description of the project that addresses its entire scope, including the needs of the community/target population.

Louisville Metro HMIS is part of a state-wide implementation of the Homeless Management Information System, called KYHMIS. Project management is divided between two partners: Coalition for the Homeless operates HMIS in Louisville (KY-501 CoC) but the Kentucky Housing Corp. operates it in KY-500 and 501 Continua. Both partners cooperate closely in all aspects of HMIS operation. Policy guidance for this project is provided by the Kentucky Interagency Council on Homelessness (KICH).

The same set of procedures is used for HMIS operation across the state. Our SOP (standard operation procedures) manual conforms to the HMIS data and technical standards published by HUD. We use commercial HMIS software called Service Point, version 5. This project does not provide housing development, housing services or any other direct service to the homeless. Our clients are the homeless providers in Louisville CoC.

This project has been in existence since 2004 and is operating at capacity. The database contains 36,195 client records for Louisville area. There are 115 users who enter data for 133 different homeless programs, including 24 services-only projects. Bed coverage is above 90% for ES and TH housing and at 75% for PSH housing. Two full-time administrators support HMIS operation in Louisville.

Louisville HMIS data is used for AHAR and PIT reports. Poor data quality is the largest problem our implementation faces. It has improved during the last year but it is not yet good enough for PULSE participation. Data quality for Louisville providers is checked 4 times a year and the results are considered when projects apply for renewal funding. Our priority for next year is to further improve data quality, start checking on timeliness of data entry and increase bed coverage for PSH housing.
